Paperless Office – Green solution powered by Intersystems

Before you make another copy ...

The Green Facts

According to the

- *U.S. Toxic Release Inventory report published by the [U.S. Environmental Protection Agency \(EPA\)](#), pulp and paper mills are among the worst polluters to air, water and land of any industry in the country*
- a 2006 report from the [U.S. Forest Service](#), the rate of harvest for softwood trees in the southern United States outpaced growth for the first time since 1953.
- a 2008 report by PaperCom Alliance the demand for paper worldwide has grown 30% in the past 6 years and is projected to grow even more and about 28% of all wood cut worldwide is used for paper making

The Business Facts

According to Gartner Group:

- *80% of business information is contained in traditional paper documents, not processed in any kind of databases .*
- *The average time needed for finding and forwarding of one document in an average size institution is 10 minutes. In the average, an employee makes 61 trips to a fax machine, copier or printer a week in order to copy a document.*

According to Honeywell, Mercedes-Benz:

- *Office workers spend 33% of the work time on searching for information, 13% on the exchange of information and only 35% on creation of documents.*
